

# Core Bytes

Welcome to the Maths, English and Science Byte!

## Did you know...

In **Maths** there are only **30** more extra morning sessions to come!

## Did you know...

In **English** we studied and memorised quotations from **15 poems**!

## Did you know...

In **11N**, students achieved full marks on 78% of the C1 booklet tests.

## What we've done and what's to come!

### English:

Students have worked very hard this year to complete the entire GCSE English literature specification. These texts include:

- *An Inspector Calls*
- *A Christmas Carol*
- *Romeo and Juliet*
- 15 poems from the AQA poetry anthology

We ended the year with our Spoken Language presentations so we can come back in September and get started on English language.

### Maths:

Students have been challenged this term familiarising themselves with the exam questions from the new specification. In particular, we have focused on AO3 which is problem solving questions. These questions draw on students' literacy and maths abilities.

### Science:

Additional students have now covered all of Physics P2 and are half way through Biology B2. Chemistry C2 will begin in the new year.

Core students are now focussing on consolidating their recall of all the Core Science content. Students should be familiarising themselves with the booklets.

Year 11s keep an eye out for the letter about the visit to GCSE Science Live in January.

## Revision, revision, revision!

### English

- Use **BBC Bitesize** and **CGP resources** on the student network to make notes on plot, character, theme and context for all texts.
- Make a bank of short quotations to memorise for each key character in the texts.
- Make mind-maps of the poems with key quotes, language techniques, structure devices and related poems.

### Maths

- Use the updated **MathsWatch** with interactive questions (for more information check your emails).
- You must watch all of Grade 1 & 2 videos on **MathsWatch** before your next mock in January.
- Attend the extra intervention morning sessions from 8.15—9.00 Tuesday and Wednesday.

### Science

Grade A:

- Learn everything in the CGP revision guide.
- Practise exam style questions in Logonscience and past paper questions.

Grade B:

- Be familiar with the whole CGP revision guide. Answer all the answers in the white work book. Work through past paper questions.

Grade C:

- Learn the revision booklets.
- Answer the questions in the white workbook.
